RESEARCH INTERESTS	Stochastic Analysis, Stochastic Partial Differential Equations, Random Geometry	
EDUCATION	University of Cambridge	Oct 2024-present
	I am currently pursuing a PhD in Probability Theory, studying a notion of universality encompassing a large class of random growth processes in the plane, namely, KPZ universality, under the supervision of Dr Sourav Sarkar.	
	University of Cambridge	Oct 2023-June 2024
	- Part III of the Mathematical Tripos with a focus in Pure Mathematics - Graduated with a Distinction	
	Imperial College London	2020-2023
	- BSc in Mathematics - Graduated with First Class Honours, ranked consecutively 1st in all years - Participated in the Rowing, Investment, Hellenic, and Social Dancing societies	
	St. Catherines' British School	2005–2020
	International Baccalaureate Programme Diploma (IBDP)	
PREPRINTS	Quantitative Brownian regularity of the KPZ fixed point with arbitrary initial data, with Sourav Sarkar. arXiv preprint. 2025 Radon-Nikodym derivative of inhomogeneous Brownian last passage percolation, with Sourav Sarkar. arXiv preprint. 2025	
PUBLICATIONS	Brownian Motion & The Stochastic Behaviour of Stocks, with Yorgos Protonotarios. Journal of Mathematical Finance 12.1 (2021): 138-149., 2021.	
WORK EXPERIENCE	Part III Seminar Series Chair in Probability	Fall 2024
	Part II Stochastic Financial Models Course Supervisions	2024-2025
	Part II Applied probability Course Supervisions	2024-2025
	Undergraduate Teaching Assistant Imperial College London	Oct 2022–March 2023
	Systematic Fund Queen Tower Capital	November 2021–June 2022
	Data Management and Analytics Internship Piraeus Bank	June–September 2021
RESEARCH EXPERIENCE	Undergraduate Research Experience (UROP) Imperial College London June–Sept. 2023 I participated in a funded undergraduate research program under the supervision of Professor Grigorios Pavliotis in the mathematical analysis of machine learning algorithms. I performed numerical experiments training neural networks under various circumstances, thereby gaining practical insights, which can be found in the 'Imperial-UROP-Project-SGD' repository in my github page above.	
	Undergraduate Research Experience (UROP) Imperial College London July–Sept. 2022 I participated in an undergraduate research program in pure mathematics supervised by Senior Lecturer in Pure Mathematics Dr. Davoud Cheraghi, combining aspects of geometric function theory and stochastic processes. This led to the study, both analytically and numerically, of the so-called conformally balanced trees. A computational investigation thereof can be found in the 'Computational-Geometry' repository in my github page listed above.	

HONOURS AND AWARDS	Governors' BSc Prize in Mathematics	September 2023
	I have been awarded the Governors' BSc Prize in Mathematics, awarded to the best performing BSc student in Mathematics at the final examinations.	
	Hellenic Union of Shipowners' Scholarship	July 2023
	I was awarded a scholarship worth €15,000 covering university tuition and maintenance costs by the Hellenic Union of Ship Owners to pursue my postgraduate studies at Cambridge University in Pure Mathematics.	
	Onassis Foundation Scholarship	July 2023
	I was awarded a scholarship worth £11,000 covering university tuition and maintenance costs by the Onassis Foundation to pursue my postgraduate studies at Cambridge University in Pure Mathematics.	
	Second Year Prize for Excellence in Mathematics Imperial College London	2022
	The annual award to students in the second year of the undergraduate course in Mathematics for excellence in Mathematics. £100	
	First Year Prize for Excellence in Mathematics Imperial College London	2021
	I was awarded a bursary for the best-performance in the first-year final mathematics examinations. £100	
	Cambridge International Scholarship	February 2024
FUNDING	This is a full scholarship on the recommendation of the University's selection committee for Cambridge International Scholarships. These scholarships are provided by the Cambridge Commonwealth, European and International Trust (www.cambridgetrust.org), which is a charity established by the University to support international students.	
	For the tenure of my PhD, the Cambridge International Scholarship will cover:	
	• University Composition Fee in full • Living expenses at the Trust's rate of £19,240 a year (2024-25 rate), reviewed annually • Immigration Health Surcharge	
	Department of Mathematics Bursary EPSRC Vacation Bursary Engineering and Physical Sciences Research Council (EPSRC)	April 2023
	I was awarded a bursary of £3024 to pursue a project entitled: Stochastic gradient descent and the training of neural networks under the supervision of Professor of Applied Mathematics Gregorios Pavliotis.	
	Department of Mathematics Bursary Imperial College London	May 2022
	For pursuing a project in random constructions in mathematics with Senior Lecturer in Pure Mathematics Davoud Cheraghi. £1250	
TECHNICAL SKILLS		
	• Programming Languages: Python, R, Java, SQL. • Technical Software: MATLAB, LaTeX. • Can deftly use Microsoft and macOS, PowerPoint, Excel, Word.	
LANGUAGES	• English: Native or bilingual proficiency, medium of instruction at Imperial College London. • Greek: Native or bilingual proficiency, achieved C1 Level Ellinomatheia. • French: Limited Working Proficiency, achieved Levels DELF A2, B1 and B2.
